Introduction

Mental health has become one of the most pressing concerns in university environments today. Students face mounting academic pressure, social challenges, and lifestyle disruptions that contribute significantly to stress, anxiety, and depression. Despite the scale of this problem, many students hesitate to seek formal help due to stigma, limited availability of counseling services, and the inconvenience of traditional support systems.

Digital solutions, particularly mobile health applications, have emerged as an accessible and non-stigmatizing alternative. However, many existing mental health apps fail to retain users because they are not designed according to students' actual needs, preferences, and daily routines. This highlights a critical gap: the need for a student-centered design approach before any prototype is built.

This questionnaire is the first phase of our research project, which aims to design a Mental Health Support App Prototype for Students using Figma. The purpose of this survey is to identify the key mental health needs, digital habits, and feature preferences of university students. The data collected will directly inform our wireframing and prototype design decisions, ensuring that the final product is relevant, usable, and accessible for its intended users.

Participation is completely voluntary and anonymous. There are no right or wrong answers. Your honest responses are what make this research meaningful.

Questionnaire

Title: Student Mental Health Needs & App Preference Survey

Estimated Time: 5–7 minutes

Target Respondents: University students aged 18 and above

Section A: Demographic Information

1. What is your gender?

Male

Female

Prefer not to say

2. What is your current year of study?

1st Year

2nd Year

3rd Year

4th Year or above

3. What is your field of study?

Engineering / Computer Science

Business / Management

Social Sciences / Humanities

Medical / Health Sciences

Other: _____

Section B: Mental Health Awareness & Experience

4. How often do you experience stress or anxiety related to university life?

Never

Rarely

Sometimes

Often

Always

5. What are the most common causes of stress for you as a student? Select all that apply.

Academic workload and deadlines

Financial pressure

Social relationships

Career and future uncertainty

Family expectations

Other: _____

6. Have you ever sought professional mental health support, such as from a counselor, therapist, or psychologist?

Yes

No

I wanted to, but did not

7. If you have not sought help, what stopped you? Select all that apply.

Fear of judgment or stigma

Did not know where to go

Long waiting times

Too expensive

Preferred to handle it myself

Not applicable

Section C: Digital & App Usage

8. Do you currently use any mobile app to manage your mental health or well-being?

Yes. Please specify: _____

No

9. If yes, how satisfied are you with the app you use?

Very satisfied

Satisfied

Neutral

Dissatisfied

Very dissatisfied

10. How many hours per day do you spend on your smartphone on average?

Less than 2 hours

2–4 hours

4–6 hours

More than 6 hours

Section D: App Feature Preferences

11. Which of the following features would you find most useful in a mental health app?

Rank from 1 = most useful to 6 = least useful.

Feature	Rank
Mood Tracking	
Journaling / Daily Diary	
Guided Relaxation & Breathing Exercises	
Mental Health Resources & Articles	
Emergency Contact / Crisis Support	
Progress Tracker & Reminders	

12. How important is it to you that a mental health app is easy to use and visually simple?

Extremely important

Important

Neutral

Not important

13. Would you prefer a mental health app that is:

Fully anonymous with no account required

Personalized with a profile and login

Either works for me

14. How often would you realistically use a mental health app if available?

Multiple times a day

Once a day

A few times a week

Rarely

Section E: Open-Ended Feedback

15. What is the one feature or quality that would make you consistently use a mental health app?

16. What frustrates you most about existing mental health or well-being apps?

17. Is there anything else you would like to share about your mental health needs as a student?

Thank you for your time and honest participation.

Your responses will remain completely confidential and will only be used for academic research purposes.
